ALPEX

DAY & NIGHT VISION SCOPE

Born for Low Light

The HIKMICRO ALPEX uses advanced sensor technology and image processing to deliver a detailed, full-colour image throughout the day automatically adjusting to twilight and continuing to display an amazing full colour image up until total darkness.

HIKTac

THERMAL SIGHT

See More, Track Fast

The HIKTac is designed for outdoor field applications, offering sharp thermal detection in low-light and challenging visual conditions. With high thermal sensitivity and a smooth 50Hz refresh rate, it helps users spot and track objects quickly and clearly. The large AMOLED display and optional laser rangefinder provide an immersive viewing experience.

STELLAR 4.0

THERMAL TUBE SCOPE

Tube design. Next-generation thermal performance

The STELLAR 4.0 Thermal Scopes feature high-resolution thermal detectors, advanced image processing and high-definition OLED displays for clear, detailed imaging. With long-range detection, built-in laser rangefinding and precise ballistic calculation, they provide reliable target identification and accuracy.

	MODEL	RANGE	FOV	MAGNIFICATION	SENSOR	RRP
STELLAR 4.0	SX75L 4.0	3600m	12.1° × 9.7°	3.0 - 30.0	1280×1024, 12 μm NETD < 12mK	$10,299
